PACKAGE OF 5 FOR \$1250

Hyperbaric oxygen therapy enhances the body's natural healing process by delivering oxygen under pressure, increasing oxygen content in the blood and in the cerebral spinal fluid, and flooding the tissues with oxygen.

Hyperbaric oxygen therapy is most commonly used to treat conditions in which tissues have been damaged by oxygen deprivation. When oxygen is restored to these tissues, much of the lost function returns. Additionally, the treatment also helps to reduce inflammation, promote circulation, and nourish your skin.
